

## Quick Start Guide- CEHA

CEHA is an open access database of references published by the World Health Organization. It covers environmental health and sanitation, focusing on the Eastern Mediterranean region. It includes the references for journals, books, theses, conference papers, technical and scientific reports.

This guide is intended to help you start searching the database.

### Searching

There are Basic and Advanced Search options. Take a few moments to have a look at these different screens, and see which works best for you and the research you are doing.

### The Search Screen

The screenshot shows the CEHA search interface. At the top, there is a 'Help' button and a 'Database : CEHAART' dropdown menu. To the right, it says 'Free form' and 'Search for : Basic form'. Below this is a search box with the prompt 'Enter one or more words'. Under the search box are two radio buttons: 'All words (AND)' (which is selected) and 'Any word (OR)'. At the bottom of the search area are two buttons: 'Config' and 'Search'. Three red callout boxes with arrows point to specific elements: one points to the 'Database : CEHAART' dropdown, another points to the 'Config' button, and a third points to the 'Basic form' link.

Click here to choose another database to search

Click here to do a more refined search

Click 'Config' to change the language to Arabic or to change what the results page looks like

When you do a search, it will automatically search for items relevant to all the words you type in the search box. But if you want to broaden your search, you can click on the circle next to **Any word (OR)** in order to search for items that are relevant to any of the words you type.

### Advanced Search (Basic Form)

<a href="#">Help</a>		Database : CEHAART ▼	Basic form
		Search for : <a href="#">Free form</a>	
	<b>Search</b>	<b>in field</b>	
1	<input type="text"/>	<input type="text"/>	index
2	and ▼	<input type="text"/>	index
3	and ▼	<input type="text"/>	index
		<a href="#">Config</a>	<a href="#">Clear</a>
		<a href="#">Search</a>	

Type a search term in the box, then select what it is you typed under 'in field'. If you use more than one row, you can select 'and', 'or', or 'and not' on the left side. Selecting 'and' will narrow your search to those items that are relevant to what you typed in both rows. Selecting 'or' will broaden your search to items relevant to either one row or the other. Selecting 'and not' will exclude items that contain what you type in that row.

## Search results

The screenshot shows the search results interface for the CEHAART database. At the top, there are navigation buttons: 'Your Selection', 'Send Result', 'New Search', 'Config', and 'Page Bottom'. Below these, the search details are displayed: 'Database : CEHAART', 'Search on : disease', 'References found : 41 [refine]', and 'Displaying : 1 .. 20 in format [Summary]'. A callout box points to the 'Send Result' button with the text: 'Click here to download or print all of the references, the references you have selected or a specific range'. Another callout box points to the '[refine]' link with the text: 'Click here to search within your results'. On the left, a callout box points to the 'select' checkbox next to the first reference with the text: 'Check the square next to a reference, then click "Your Selection" to see and print all the references you have selected'. The first reference is: '8085 Shellfish sanitation challenges in the 1990s Schwaim, D. J. Water Quality Bulletin 1989 ; P. 205 Foodborne disease prevention; Outlook; Water quality; Shellfish; Sanitation; Challenge'. The second reference is: '7570 Inorganic contaminants in drinking water correlated with disease occurrence in Nebraska Bednar, C. M.; Kies, C. Water Resources Bulletin 1991 ; P. 631 Nitrate; Groundwater contamination; Water, drinking; Disease occurrence; Nebraska'. The page is labeled 'page 1 de 3' and has a 'go to page' navigation with options 1, 2, and 3.

Once you have done a search, you will be taken to a list of references. At the end of each reference is a list of keywords.

## Further help

If you need any help whilst using the database click on **Help**
